

## The Basics of Photoshop

Whether you have Photoshop from the Creative Cloud or Photoshop Elements, many of the features we will cover in this class are the same in both programs. For Photoshop Elements users, we will be working in the full editor mode.

In this class, we will cover the most commonly used tools, such as the lasso, the spot healer (bandaid), the cloner, the brush, and the text tools. You will learn about layers and masking, as well as adding adjustment layers.

This class will not turn you into a Photoshop expert, but it will help you gain familiarity with the tools and the workspace, so that you will be more comfortable using it, especially if your primary editing software is Lightroom.

For class you will need either a laptop or a desktop with the software installed. Handouts will be provided.

A minimum of four students is needed to hold a class.

**Cost:** \$90

**Place:** New Market, MD (address sent after enrollment)

**Time:** 9 am – 3 pm (Bring your lunch)

**Dates:** Saturday, January 13 (with ASL interpretation) or Saturday, January 27

**To enroll:** Send email to [cam.miller@comcast.net](mailto:cam.miller@comcast.net). Please indicate which date you want, which software you have, and any other questions you may have. Once it is determined the class is a “go,” you will be sent an electronic invoice. In case of inclement weather, the class will either be rescheduled or refunds will be issued.
